ABOUT ME

I am a Software Engineering enthusiast focused on delivering high-impact, scalable digital solutions. My expertise includes frontend development, WordPress, UI/UX design, digital design, and AI-powered automation for end-to-end product delivery. I specialize in integrating artificial intelligence to build intelligent systems, optimize workflows, and create data-driven user experiences. My approach combines clean code, modern design, and measurable business outcomes. Beyond execution, I actively mentor developers and advocate AI adoption to support a future-ready technology ecosystem.

SKILLS

- Software Engineering Principles
- Full Stack Development
- Software Quality Assurance
- Research-Based Writing
- Video Editing & Post-Production
- Machine Learning Algorithms
- Content Writing & Copywriting
- AI Agent Development
